### The process of the prize draw

The winner is contacted via e-mail right after the prize draw where we share further information on the ways of taking over the prize. The winner needs to reply -and decide whether accepting the prize or not- within 3 days.

After selecting the winner on the prize draw, we select a substitute winner who is entitled for the prize if the original winner is not accepting the prize or he/she does not reply to the e-mail in the given 3 days.

After selecting the winners, we select 5 substitute winners according to the daily ranking who are entitled for the prize if the original winner is not accepting the prize or he/she does not reply to the e-mail in the given 3 days.

In the case of equal points reached in the list of top 10 players, the names of the players reaching equal points will be placed in a randomizer (<https://www.random.org/lists/>). After the randomization, the person on the top of the list is the winner of the prize.
